

PLASTER FRAME Q FOR 2 GU10 BULB

Typology

The Gessi recessed family is available in several models, all prepared to accommodate one or two GU10 lamps (lamp holder to be ordered separately). Complete with lamp-locking spring.

Features

These plaster "frames" create the striking effect of light emanating from soft perforations in the ceiling. Their structural nature, the absence of visible metal elements, and the paint finish matching the ceiling in which they are recessed all contribute to making light the elegant protagonist.

Installation

Equipped with tabs for fixing to the plasterboard sheets in which they are inserted, they are grouted on the sides.

Material

Plaster with integrated aluminium flanges for quick and easy installation.

Applications

Ceilings where functionality and aesthetics are to be combined.

Notes

The lamps shown in the photo are for illustrative purposes only; lamp holder and bulb are not included.
