

COB PRO YELLOW PHOSPHORS

Typology

COB PRO Strips adopt advanced “Flip-Chip” technology, allowing greater compactness and higher energy efficiency.

COB PRO Strips are designed with a white profiling on both sides of the chip to prevent light dispersion and color temperature variation at the beam edges.

The circuit, enhanced with a thicker copper layer, reduces voltage drops and ensures uniformity.

All materials are selected at the highest quality of the state of the art.

The innovative protective structure ensures durability, long-term reliability, and extreme flexibility, with curves with bending radii up to 50 mm.

Installation

Complete with 3M double-sided tape to attach to the surface.

When using double-sided tape degrease the application surface adequately.

Various cutting pitch options in different models: tight cuts down to 21 mm.
